shardul@u.yale-nus.edu.sg

Education

- May 2020 **Yale-NUS College**, Singapore GPA: 4.81/5.00
B.S. (Hons.) in Mathematical, Computational and Statistical Sciences, *Magna Cum Laude*
Software Engineering Tutor (2019)
Summer Coursework in Engineering, **Yale University**, New Haven, USA (2017)
- Dec 2018 **Massachusetts Institute of Technology**, Cambridge, USA GPA: 5.00/5.00
Coursework in the Department of Electrical Engineering and Computer Science, and MIT
Media Lab (Exchange Semester)

Research Experience

- Sep 2019–present **NUS-HCI Lab**, National University of Singapore, Singapore
PI: Shengdong Zhao
- Developed apps for smart glasses; wrote a paper as a co-first author on quantifying the intrusiveness of four wearable input techniques for smart glasses. (*Sapkota et al., 2021*)
 - Designed experiments with a novel psychophysics attention task; applied signal processing (non-linear metrics and frequency analysis) on EEG, skin conductance, and heart rate data. (*Undergraduate thesis; Zhang et al., 2021*)
 - Designed and implemented machine learning models to classify in real time whether or not people are “in the zone”, with up to 81% accuracy using physiological data. (*Undergraduate thesis; Zhang et al., 2021*)
- May–Aug 2019 **Augmented Human Lab**, University of Auckland, New Zealand
PI: Suranga Nanayakkara
- Developed a smartphone based conversational agent that provides context-aware memory training for prospective memory lapses using heart rate and skin conductance signals; wrote manuscript draft. (*Chan et al., 2020*)
 - Built a cognitive load detection tool using an eye-tracker and CNN classifier; designed experiments; wrote manuscript draft. (*Kaluarachchi et al., 2021*)
 - Programmed a display driver for an OLED display in a smart watch designed for those with hearing impairments.
- Sep–Dec 2018 **Fluid Interfaces Group**, MIT Media Lab, Cambridge, USA
PI: Pattie Maes
- Conducted experiments on using jaw-teeth gestures for hands-free interactions with mobile systems; performed statistical analyses; wrote manuscript draft. (*Vega et al., 2019*)
 - Built a mobile gesture recognition tool; developed machine learning models to classify jaw-teeth gestures with average accuracy rate of 96% using accelerometer and gyroscope data. (*Vega et al., 2019*)

Technical Skills

Proficient in **Python**, **Golang**, and **LaTeX**. Experience in **Java**, **Swift**, **JavaScript**, **C**, **HTML**, **CSS**, **MATLAB**, **R**, and **OCaml**.

Work Experience

- Aug 2020–present **Shopee (SEA Group)**, Singapore
Machine Learning Engineer
- Implement deep sequential models to reduce the number of hand-crafted features and provide personalized recommendations based on user behavior.
 - Develop data pipeline and statistical models to update users' recommendation pools in real-time.

Publications

Sapkota, S.*, Ram, A.* and Zhao, S., 2021. Ubiquitous Interactions for Heads-Up Computing: Understanding Users' Preferences for Subtle Interaction Techniques in Everyday Settings. *23rd International Conference on Mobile Human-Computer Interaction (MobileHCI'21)*, pp.1-15.

Kaluarachchi, T.I., **Sapkota, S.**, Taradel, J., Thevenon, M.A., Matthies, D.J.C. and Nanayakkara, S., 2021. EyeKnowYou: Detecting Increased Cognitive Load and Actual Screen Time using a DIY Head-Mounted Webcam. *Extended Abstracts of the 23rd International Conference on Mobile Human-Computer Interaction (MobileHCI'21)*, pp.1-8.

Zhang, S.*, Yan, Z.*, **Sapkota, S.**, Zhao, S. and Ooi, W.T., 2021. Moment-to-Moment Continuous Attention Fluctuation Monitoring through Consumer-Grade EEG Device. *Sensors*, *21*(10), pp.3419.

Chan, S.W., **Sapkota, S.**, Mathews, R., Zhang, H. and Nanayakkara, S., 2020. Prompto: Investigating Receptivity to Prompts Based on Cognitive Load from Memory Training Conversational Agent. *Proceedings of the ACM on Interactive, Mobile, Wearable and Ubiquitous Technologies*, *4*(4), pp.1-23.

Vega Gálvez, T., **Sapkota, S.**, Dancu, A. and Maes, P., 2019. Byte.it: discreet teeth gestures for mobile device interaction. *Extended Abstracts of the 2019 CHI Conference on Human Factors in Computing Systems*, pp. 1-6.

* Denotes equal contribution.

Projects

- 2019 **DiaryRack**: Applied constrained optimization with integer programming to automate meeting scheduling in calendars as part of an independent research project.
- 2018 **Yale-NUS Laundry Viewer**: Led a team of 3 students to design, prototype, and develop a platform providing real-time monitoring of laundry machine status using LED sensors.
- 2018 **StandRight**: Programmed force sensitive resistors and a servo motor attached to a shoe to tighten shoelaces during unequal weight distribution for those who have leg injuries.

Honors and Awards

- 2020 Singapore-HCI Paperthon *Most Promising Paper* (for Sapkota et al.)
- 2019 Yale-NUS Student-Initiated Summer Research Fund (S\$5750)
- 2018 JY Pillay Global-Asia Programme Summer Internship Award (S\$1187)
- 2016 Outstanding Cambridge Learner: Top in the world in Mathematics, AS Level.
